- Jennings, F. D. and R. A. Schwartzlose, 1960. Measurements of the California Current in March 1958. *Deep Sea Research*, 7:42-47.
- Johnson, M. W., 1960. Calanoida. *McGraw-Hill Encyclopedia of Science and Technology*, 2:392-393.
- Johnson, M. W., 1960. Copepoda. *McGraw-Hill Encyclopedia of Science and Technology*, 3:462-463.
- Johnson, M. W., 1960. The offshore drift of larvae of the California spiny lobster (*Panulirus interruptus*). *Calif. Coop. Oc. Fish. Inv. Reports*, 7:147-162.
- Kramer, D., 1961. Development of the eggs and larvae of the Pacific mackerel (*Pneumatophorus diego*) and distribution and abundance of larvae 1952-56. *U.S. Fish and Wildlife Service, Fish. Bull.* 174, 60:393-438.
A study of the gross development of the eggs and larvae (including morphometry and ossification) are described. Distribution of larvae is discussed for 1952-56 with census estimates by area and month in patterns covered on CalCOFI surveys.
- Lance, J. R., 1962. Two new opisthobranch mollusks from Southern California. *The Veliger*, 4(3):155-159.
- Lance, J. R., 1962. A new *Stiliger* and a new *Corambella* (Molluscs: Opisthobranchia) from the Northwestern Pacific. *The Veliger*, 5(1):33-38.
- Lance, J. R., 1962. A new species of *Armina* (Gastropods: Nudibranchia) from the Gulf of California. *The Veliger*, 5(1):51-54.
- Lasker, R., and G. H. Theilacker, 1962. Oxygen consumption and osmoregulation by single Pacific sardine eggs and larvae (*Sardinops caerulea* Girard). *Journal du Conseil*, XXVII, (1), 1962: 25-33.
- Lasker, R., and G. H. Theilacker, 1962. The fatty acid composition of the lipids of some Pacific sardine tissues in relation to ovarian maturation and diet. *Journal of Lipid Research*, 3(1):60-64.
- Morgan, A. R., and D. E. Gates, 1961. A cooperative study of shrimp and incidental fish catches taken in shrimp fishing gear in California and Oregon, 1958. *Pac. Mar. Fish. Comm. Bull.* 5:85-106. Differences are demonstrated in catches of shrimp and incidental fish made with three gear types used. This includes: (1) variations in ratios of numbers and weights of fish to pounds of shrimp by gear type; (2) numbers of fish and pounds of shrimp by gear type; (3) possible differences in size of fish and shrimp by gear type; and (4) effectiveness of particular trawls in the catch of certain species.
- O'Connell, C. P., 1960. Use of a Fish School for Conditioned Response Experiments. *Animal Behavior*, 8(181):225-227.
Experiments to determine whether a sardine school could be conditioned as a unit and whether conditional response would be adversely affected by replacement of mortalities with untrained individuals.
- Radovich, J., 1959. Some causes of fluctuations in catches of the Pacific sardine (*Sardinops caerulea*, Girard). *Volume III, Proceedings of the World Scientific Meeting on the Biology of Sardines and Related Species, FAO, Rome, Italy, September, 1959*:1081-1093.

- Radovich, J., 1961. Pelagic fish sea surveys (methodology). *Proceedings of The First National Coastal and Shallow Water Research Conference*, 610-614.
- Radovich, J., 1961. Relationships of some marine organisms of the Northeast Pacific to water temperatures particularly during 1957 through 1959. *Calif. Dept. Fish and Game, Fish Bull.* 112, 62 p. Concurrent with the warming of the ocean off the Pacific Coast of North America beginning in 1957 and extending through 1959, many southern marine species wandered north of their usual range. An analysis of past records showed similar intrusions during previous warm-water years. The northward distribution of some invertebrates seemed more closely related to the development of the countercurrent than to the increase in temperature.
